

Application profile

“Silverton”
12.8m (42’) Motor Yacht

ANACORTES, WASHINGTON USA

The owner of this boat was interested in the **WhisperGen™** onboard heat & power system, as the boat spends most of its time at anchor in remote locations.

“My requirements were for a quiet power and heating source that did not intrude on my surroundings”.

During the 2007 cruising season the WhisperGen’s inaugural cruise was a several month 2,300 mile trip to Alaska from Seattle. During this long trip, the unit ran for almost 600 hours and 115 starts.

“I am now in Prince Rupert....many, many miles north of Seattle. Opening day was a huge success and the WhisperGen™ was a HERO. Not only was it a quiet, it has keep the boat warm, no problem”.

INSTALLATION: North Island Boats, Anacortes

DISTRIBUTOR: Cascade

BUILDER: Silverton

you can relax, it's a **WhisperGen™** onboard heat and power system

ELECTRICITY ONBOARD

SYSTEM PRIMARY USE:
Battery Charging & Space Heating
